

# Kaizen

Make the world a better place, day by day

This applies to your code as well

# [Boyscout Rule]

Always leave the code better than you found it.

- Remove technical debts
- Renaming, documentation, tests, or
- Clean(er) Code
- Small or smaller, depends on you

# [Broken Window Principle}

- If you start breaking it,
- Everyone will continue.

# [30 second rule]

If it takes only five minutes, do it now

- If it can be fast, do it now
- If it is a bigger task, create a ticket
- If there are too many "five mins", create a `TODO`

- Think Big
- Start Small
- Learn Fast
- Begin Now

? What is hindering you ?
